

SUPPLIER RISK SOLUTIONS

Amid growing geopolitical tension and an increasingly uncertain operating environment, supply chain disruption has reached new peaks for companies worldwide. As a result, demand and inventory planning has never been more complex.

Thanks to a vast and rigorous suite of supplier risk solutions, Moody's Analytics is helping companies regain visibility of the weak spots that impact their supply chain performance. Our best-in-class data and analytical capabilities enable you to identify, anticipate and manage real-time supply chain risks and potential disruptions – to help you build resilience and keep your business moving.

With Moody's, you can...

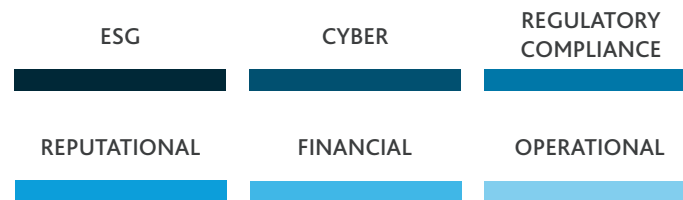

PREDICT

Use predictive analytics and data to help evaluate supplier performance risk and identify suppliers with high likelihood of near-term financial and operational decline.

PRIORITIZE

Use Moody's data and insights to prioritize risks based on your company's risk profile and tolerance.

Gain a holistic view of supplier risk exposure across these major risk types

Our industry-leading solutions
